ABOUT US: OUR AIMS & ACHIEVEMENTS

Earth Learning Incorporated is a local not for profit group. Our aims include conserving our native habitat and furthering a wider understanding of the rich diversity of plants and animals that inhabit the Tweed & Border Ranges.

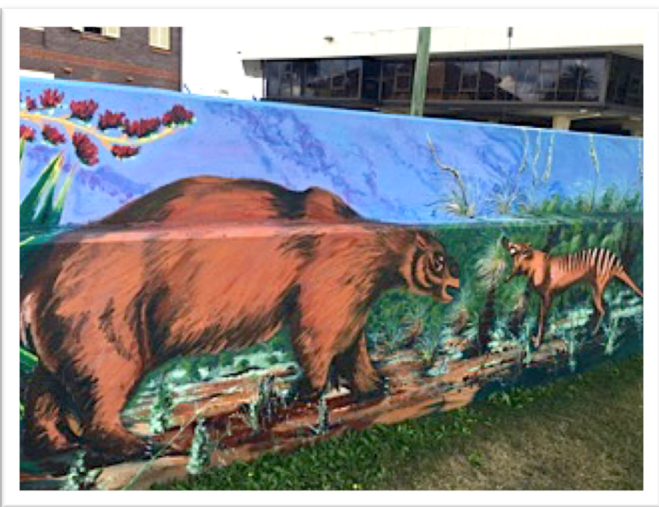

Education.

Earth Learning conducts innovative and creative children's workshops at various community events and markets throughout the year

Workshop: Murwillumbah Art Trail 2018

Creative Achievements.

Earth Learning has designed and painted a public mural in central Murwillumbah with local volunteers and artists. The "Ages of The Tweed" (located on Murwillumbah's 'Levee wall') is a colourful depiction of the evolution of our native plants and animals. Our Eco-Art Mural project is anticipated to extend to new sites in the town

Our enchanting children's picture book "GOLD" was published in 2016. It has been highly praised and well accepted as a unique teaching tool about the fauna of our region.

"GOLD"
Jane Staderman

Special Events

Earth Learning has held several events to promote community engagement with our environment and its unique flora & fauna. Fascinating talks by well know ecologists and luminaries (like Dr Karl Kruszelnicki) have been a great source of insight & entertainment.

Ongoing..... *Earth learning welcomes you & your ideas to help in a wide range of interests and passion*
